PROJECTS

Backend for an Olympiad website

Currently I am working on creating APIs for an olympiad website which includes features like registering schools, attempting olympiad, etc.

Chat App

Created a chat-app in which users can create or join a room and chat in that. It also provides features to send locations etc, in the chat box

Backend for shopping website

Created APIs for an e-commerce website, where the seller can create an account and add or delete products he wants to sell and users can add and products in their cart and buy them as well
